1 Operating System footnotes:
 All later service packs are considered viable unless otherwise noted. Refer to the Support website for specific notices.

 For Windows Server 2012, the "Server with a GUI" installation option is required. Specifically,
 • The WS 2012 "Server GUI Management Infrastructure" component **MUST** be installed (this provides MSVBVM60.dll and DAO which are required by WebMap)
 • The WS 2012 "Server GUI Shell" sub-component is optional (this provides "Explorer.exe")
 Also, if down-grading WS2012 from GUI to no-GUI, you should only un-install the "Server GUI Shell" component. Uninstalling "Server GUI Mgmt Infra" also removes DAO.

2 Cloud Environments Footnotes:
 None

3 Database Engine footnotes:
 All later service packs are considered viable unless otherwise noted. Refer to the Support website for specific notices.

4 Internet Browser Footnotes:
 All later service packs are considered viable unless otherwise noted. Refer to the Support website for specific notices.

5 Intergraph Applications Footnotes:
 All later service packs are considered viable unless otherwise noted. Refer to the Support website for specific notices.

 Required for GeoMedia WebMap Publisher Administrator.

6 Third-Party Application Footnotes:
 For information on supported output types, see the GeoMedia WebMap documentation.

7 System Dependencies Footnotes:
 None

Key:
 X = Software is supported on this version
 R = Required
 O = Optional
 U = User must install
 A = Automatically installed by Setup, if not found
